

To whom it may concern.

I am writing this letter of recommendation in favor of Mr. José César Costa Filho, whom I have known since 2010.

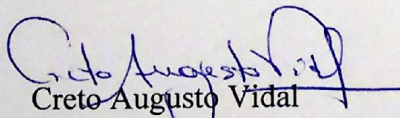

I received a Ph.D. degree in Civil Engineering in 1992 from the University of Illinois at Urbana-Champaign, one of the top-three graduate programs in Structural Engineering of the United States. During my Ph.D. program at the University of Illinois, I was a research assistant at the National Center for Supercomputing Applications (NCSA) where I worked in a scientific visualization project (RIVERS project) led by my adviser, Professor Robert Haber. After I received my Ph.D., I was appointed as Postdoctoral Research Associate to the department of Mechanical and Industrial Engineering at the University of Illinois, where I stayed until my return to Brazil in 1994.

I do not take lightly the importance of a recommendation letter for the selection of graduate students. Therefore, it is with great confidence that I write this recommendation in favor of Mr. José César Costa Filho.

Mr. Costa Filho was among the top ten percent in the two courses I was his instructor. He also worked under my supervision in a project for developing a Virtual Reality application for training the shooting skills of the police force. After that project, he was granted a one-year scholarship from the Science without Borders of Brazil to study in Seoul - Korea.

He is a serious student, and very nice person to deal with. I can testify that he has a strong background in Computing and is highly motivated to pursue graduate studies. I have no doubts that he will succeed in his endeavors.

Fortaleza, 28th of October 2015

Creto Augusto Vidal
Associate Head
Department of Computing
Federal University of Ceará
