

To Whom it May Concern:

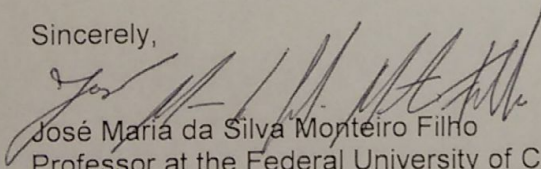

Mr. Cesar has informed me about his intention of pursuing a master's degree on the areas related to games and digital entertainment. Thus, I write this letter with great pleasure to testify about his commitment and high qualification through his personal and academic backgrounds, assuring he is a strongly suited candidate for this scholarship program.

Among my general impression of him as student, Mr. Cesar displayed an eagerness to pursue his academic experience beyond the role of an ordinary student. During the early years of his graduation, he participates on the Student's Representative Organization, engaging on several supportive activities for freshmen and aspiring new students. As example: the Profession's Festival, an event to presents the course structure, and help aspiring new students choosing the course to apply, providing them information, and the opportunity to clean their doubts regarding the course directly with other students; and the organization of the Zero Week, an event to welcome freshmen students.

I instructed Mr. Cesar in the course of Introduction of Database Systems. Besides, I was his mentor during his Final Project. In several opportunities, I could testify his enthusiasm when he addressed his efforts into some activities related to game development. I could also verify his involvement with the game area along his graduation course, including his leadership on the study groups dedicated to this subject, personal and team projects, and, more recently, his participation and classification on national competitions, as the Games Festival of the SBGames (the brazilian symposium on games), where he was finalist in 2013 and 2015, and in a national competition called Inovapps, where he obtained awards in 2014 and 2015.

I am pleased to inform that Mr. Cesar now hopes to pursue further studies on an area which he dedicates so much passion. Based on my observation, he clearly has the interest required to make an excellent work, besides, he has the abilities necessary to achieve success. He has also acquired considerable international experience during his participation on the exchange program Science Without Borders, where he attended at Soongsil University in South Korea, on the department of Media. Time on which I believe he improved significantly his skills and showed to possess a great potential.

Sincerely,

José Maria da Silva Monteiro Filho
